

Give yourself a present, forgive yourself

PROJECT

This page is part of a larger project which will be shown in London, Helsinki, Paris and Oslo during autumn and winter 2001-2002. The theme of the project is forgiving, and it will consist of short films, an installation and manufacturing of a series of blankets.

SNOW

During the late autumn snow falls and covers nature. It forms a light kind of blanket which covers the plants and protects them from the cold.

BLANKET

For autumn 2002 a series of blankets will be manufactured to accompany the project in different places. The blanket is manufactured in a combination of wool and cotton grass fibre. The text above will be printed on the blanket.
