Sandy said it well in a post a little bit higher up. An uneducated group of people forming a democracy can be a dangerous thing. People must be individuals, and as individuals must be set free from their brothers and sisters. The "collective entity" must be broken up whether it be the collective mind of a particular religion, race, sex, or class.

The US squandered a lot of good will it enjoyed after September 11. It is regarded as a dangerous country by many now. It seems that it does not enjoy a free press now, a requisite for a functioning democracy.

Sorry to say, but most of you a systematically, stupidly anti-french. Most people here think being against the war means you are a terrorist or a coward.

dear Muslim brothers, ...the problem of today is that our religion is in great danger. all the non muslims r united against us. all muslims should think about this. the

Understand Muslims???? Are you stupid? These people aren't MUSLIMS!!!! They hide behind the Muslim religion; They try to use the name of god to justify innocent killings. MUSLIMS DON'T KILL!!!

Why democracy and free market works in America but not others. With a strong local economy, it is impossible if not extremely difficult for foreign companies to penetrate the American market,

let alone manipulate.

With the richest and most powerful mass media coporations all based in USA and owned locally, it is impossible for its media to be manipulated and influences by foreign sources.

Freedom give room to abuses, having political freedom and freedom of speech can be easily abused by many people (drugs, proverties and prostitutions). But having a high proportion of Christians with moral values keep the system relatively moral and humane.

Hey...

Iran had a DEMOCRACY GOING IN THE 50S. But its deomcratic government wanted to nationalize Oil Production. So CIA and MI6 got together to fund terrorism to destroyed that DEMOCRACY.

The fact is America doesn't care whether a foreign country is democracy or anything else as long as it is a puppet. If the democratic people in China win eventually and they decide not to be western puppets (sell off the country) I am sure that CIA will start funding the "communist dissidents"... give them money to set up web sites, demonize the democratic China., trigger civil unrest and so forth. Just to mess up the country again so that they can get a pupper government...

Either way you will end up supporting somthing that is morally wrong. Super powers are never created or maintained by doing whats right. I don't care what anyone says. Of course people will raise the flag and believe the moral blad. But it doesn't matter if its the US, China, Russia, France, Japan etc. The best thing to do is figure why everyone is doing what.

A popular leader can kill millions, invade relatively peaceful neighbors, attack innocent countries with little provocation, and be loved for it. A less charismatic leader might do whatever neccessary to stop or postpone a global conflict and be ridiculed for it.

A democracy (especially one as tenuous as America's) is all about popular opinion RIGHT NOW.

Tyskland har officielt sagt undskyld til de lande de har koloniseret. Ligesom Tyskland også har undskyldt overfor de lande de har bekriget. Desuden har de uopfordret betalt 80 milliarder DMark i erstatning til jøderne. I dag er Tyskland imod krig.

'Follow the Germans do apologize' står der trykt på SPACECAMPAIGNs afspærringbånd, der ligner det politiet bruger. Disse bånd placeres på historiske selvforherligende bygninger, buster og statuer (ja, alle mænd til hest) rundt omkring i Europa. Båndene skal omkredse symbolerne på de dele af historien vi af hensyn til vores egen selvforståelse har "glemt" at huske.

Vil du ha' bånd med på rejsen så kontakt:
